EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John D. Magluyan on January 19, 2007.

The application has been amended as follows:

Re-write claim 185 to state:

185. A body temperature managing method, comprising:

- a body temperature data obtaining step for obtaining enciphered body temperature data;
- a body temperature data storing step for storing said enciphered body temperature data obtained in said obtaining step;
- a duplicate creating step for creating a duplicate of said enciphered body temperature data;
- a data deciphering step for deciphering said body temperature data created in said duplicate creating step;
- a body temperature data analyzing step for analyzing the body temperature data deciphered in said data deciphering step;
- a deleting step for deleting said deciphered body temperature data following

Art Unit: 3736

completion of said analyzing step;

an analyzed data transmitting step for outside transmitting of analyzed data

analyzed in said analyzing step; and

a presenting step for presenting a list of facilities according to the analysis

results analyzed in said body temperature data analyzing step[[.]];

a counting step for counting a number of reservations, in the event that reservations have been made at an arbitrary facility from the facility list presented in said presenting step; and

a cash-back step for giving cash back based on the counted number of reservations.

Re-write claim 186 to state:

186. A body temperature managing device,

body temperature data obtaining means for obtaining enciphered body temperature data;

body temperature data storing means for storing said enciphered body temperature data obtained by said obtaining means;

duplicate creating means for creating a duplicate of said enciphered body temperature data;

data deciphering means for deciphering said body temperature data created by said duplicate creating means;

body temperature data analyzing means for analyzing the body temperature data deciphered by said data deciphering means;

deleting means for deleting said deciphered body temperature data

Art Unit: 3736

following completion of said analyzing means;

analyzed data transmitting means for outside transmitting of analyzed data

analyzed by said analyzing means; and

presenting means for presenting a list of facilities according to the analysis

results analyzed by said body temperature data analyzing means[.];

counting means for counting a number of reservations, in the event that reservations have been made at an arbitrary facility from the facility list presented in said presenting means; and

cash-back means for giving cash back based on the counted number of reservations.

Re-write claim 187 to state:

187. (Previously Presented) A computer-readable storage medium storing a computer-executable program for managing body temperature, said program comprising:

body temperature data obtaining code for obtaining enciphered body temperature data;

body temperature data storing code for storing said enciphered body temperature data obtained by said obtaining code;

duplicate creating code for creating a duplicate of said enciphered body temperature data;

data deciphering code for deciphering said body temperature data created by said duplicate creating code;

body temperature data analyzing code for analyzing the body temperature data deciphered by said data deciphering code;

Art Unit: 3736

deleting code for deleting said deciphered body temperature data following completion of said analyzing code;

analyzed data transmitting code for outside transmitting of analyzed data analyzed by said analyzing code; and

presenting code for presenting a list of facilities according to the analysis results analyzed by said body temperature data analyzing code[[]];

counting code for counting a number of reservations, in the event that reservations have been made at an arbitrary facility from the facility list presented in said presenting code; and
cash-back code for giving cash back based on the counted number of reservations.
